Table 2. Differences Between Trainee and Comparison Peer Groups

Question	Trainee	Comparison Peer	P
Which of the following disciplines do you regularly interact with in your primary work/volunteer/educational setting? (Sum of Total Number of Disciplines Endorsed), *Mean (SD)*	5.6 (3.2)	4.0 (2.4)	0.034
Endorse "Opportunity to work with special needs populations" as a Top Three reason for accepting current position, *N (%)*	20 (48.8)	6 (22.2)	0.027
Endorse "Organizational values" as a Top Three reason for accepting current position, *N (%)*	1 (2.4)	6 (22.2)	0.009
Endorse "Location" as a Top Three reason for accepting current position, *N (%)*	11 (26.8)	14 (51.9)	0.036
Endorse "Chance to 'do good'" as a Top Three reason for accepting current position, *N (%)*	2 (7.4)	11 (26.8)	0.046
Endorse "Research" as one of the areas in which they consider themselves to be a leader, *N (%)*	7 (7.1)	0 (0.0)	0.023
Have ever "supported a family or individual by advocating for their legal or medical rights", *N (%)*	36 (87.8)	18 (66.7)	0.035
Have ever "helped a family or individual with their own self-advocacy efforts", *N (%)*	39 (95.1)	21 (77.8)	0.030
Have ever "participated in program evaluation on the effectiveness of a service delivery system", *N (%)*	34 (82.9)	16 (59.3)	0.030
Have ever "participated in research related to vulnerable populations", *N (%)*	36 (87.8)	16 (59.3)	0.007
Have ever "evaluated a health care policy for your own or another organization", *N (%)*	28 (68.3)	10 (37.0)	0.011
Agree that "people with special needs should be able to take on the same adult roles as people without special needs", *Mean (SD)*	1.6 (0.5)	1.9 (0.6)	0.033
Agree that "I change the way that I present information depending on the type of group for which I am presenting", *Mean (SD)*	1.3 (0.5)	1.7 (0.9)	0.031
Agree that "I can develop a plan of care incorporating a medical home model in collaboration with families", *Mean (SD)*	2.0 (0.7)	2.4 (0.8)	0.045
Agree that "I know how to access state and federal health data for individuals with special needs", *Mean (SD)*	2.4 (0.8)	2.9 (0.9)	0.021
Agree that "I am able to discuss the ethical implications of health care disparities", *Mean (SD)*	1.8 (0.6)	2.3 (1.0)	0.006

Note. Independent samples t-tests were used to assess group differences for continuous variables. Chi-square analyses were used to assess group differences for categorical variables.

Grey highlighting signifies individual questions on the LEND Outcomes Follow-Up Survey. Some questions where our group identified significant differences between LEND Trainees and Comparison Peers were subquestions that were part of a broader question, and these subquestions are listed sequentially as they appeared on the survey and are highlighted in either white or grey.
