

What to Know About Your Members of Congress

A Member of Congress (MOC) is a person who has been appointed or elected and inducted into an official body called a congress, typically to represent a particular constituency in a legislature.

Who Represents you in the Federal Government

If you live in a state, you have one Representative in the House who represents the district (area) in which you live and two Senators who each represent the entire state. If you live in a territory or the District of Columbia, you have one Delegate to the House and no Senators. These are your Members.
