Defining Diversity

• **EDI Action Plan:** Diversity is a multifaceted and fluid concept used to describe differences in ethnic or racial identity, tribal or clan affiliation, nationality, language, age, gender identity and expression, sexual orientation, socioeconomic status, education, religion, spirituality, physical and intellectual abilities, personal appearance, and other factors that distinguish one group or individual from another.

• **MCH:** A culturally and linguistically responsive program is characterized by, written strategies and policies for advancing cultural responsiveness and linguistic diversity; provision of knowledge and skill building for trainees, faculty, and staff; data on populations served according to cultural and historically underserved status—racial, ethnic, linguistic, disability, etc.; faculty and instructors representing diverse backgrounds; and periodic assessment of trainee, faculty, and staff progress in developing cultural and linguistic responsiveness.
Defining Diversity

• **AIDD**: Diversity includes:
  1. Individuals from racial and ethnic minority backgrounds
  2. Individuals with limited English proficiency
  3. Individuals from underserved geographic areas (rural or urban)
  4. Different disabilities
  5. Lesbian, Gay, Bisexual, and Transgender
