

Free resources to support early childhood development:

1. For families to monitor children's development and help clinicians with developmental surveillance recommended at each health supervision visit:
[Get Free "Learn the Signs. Act Early." Materials | CDC](#)
2. A handout to share with administrators and clinicians regarding how integration of *Learn the Signs. Act Early.* resources into your clinic can help the families you serve:
[CDC's Learn the Signs Act Early for Healthcare Providers](#)
3. SPARK training- a brief 15 minute training for clinic teams to learn why and how to do developmental surveillance. This free training, developed by the American Academy of Pediatrics (AAP) with support from the CDC, includes a ready-to-use [PowerPoint presentation](#), [facilitator script](#), and [case study](#).
4. Free AAP Pedialink trainings regarding developmental surveillance and autism. CME/MOC credits available for clinicians and nurses.
[Milestones Matter: Don't Underestimate Developmental Surveillance](#)
[Identifying and Caring for Children with Autism Spectrum Disorder: A Course for Pediatric Clinicians](#)
5. Connect with your state or territory's Act Early Ambassador to learn more about what is happening locally regarding early identification and intervention for children with developmental delays and disabilities.
