

Roundtable Discussion

Topic: Contacting gender and other ethnographic data on less frequently contacted Trainees

Suggested questions to consider:

- Do other Centers have hints as to how to collect gender and any other ethnographic data on less frequently contacted medium and short term Trainees?
- Or any other data about Trainees that is hard to obtain?

Summary

Each site is unique & has different methods, buy-in from staff & resources - Getting buy-in from staff to identify trainees so info can be gathered; To use other databases such as Red Cop & Apricot to gather the info for entry in input; to put rules in place that are supported by director or other w/ power to capture needed data for those non-compliant -

Also, to look to show & what the data to move forward → for gender ^{i.e.} how male/female/other on gender related options especially trainee Registration forms & UCEAP Directory.

Roundtable Discussion

Topic: Multiple surveys completed by one Trainee

Suggested questions to consider:

- For centers who have multiple training programs, which run on different schedules, and have to survey trainees of both types of training programs - how do you inform the trainees of the need to fill out multiple surveys? How do you reliably pull their survey data from NIRS?
- NIRS allowing one Trainee to have multiple hats under one entry in NIRS vs. creating three separate entries for their multiple hats (for example: the LEND, the GRA, and the Disability Certificate trainees may or may not overlap roles and have multiple years of roles/different and overlapping hats). Could we have one entry and just different "survey codes" generated per type/role(s)? What are others doing for this?

Summary

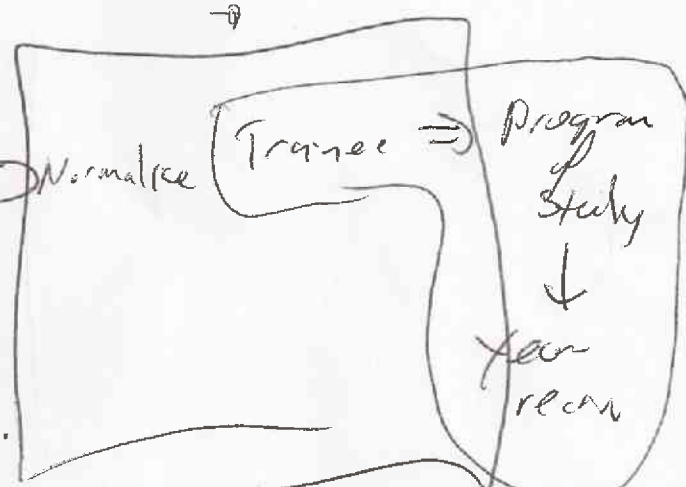

→ custom fields → in trainee for "Program" →
 Yes: - Program

- All LEND Trainees as UCED

→ advocates

Recommendations

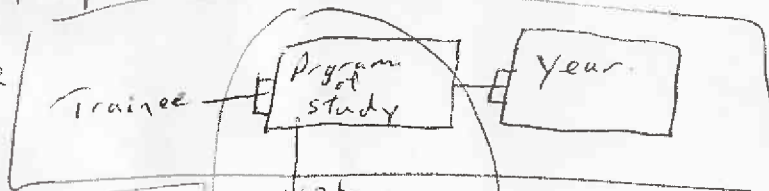

→ count Trainees once
 - Programs
 →

issue of LEND-UCED Dichotomy.

→ Count by the post rather than the trainee.

→ or Normalize

↓ Define as LEND, UCED etc. by program.

NEW Table in NIRS
