Request for Application: Applications Due October 17, 5pmET
This RFA is limited to AUCD network members and is contingent upon funding from the AUCD-CDC Cooperative Agreement

Informational Call: Questions & Answers Summary

Q. The RFA says it is contingent upon funding from the AUCD-CDC Cooperative Agreement. Do you already have sufficient funding to award this opportunity?
A. Yes – AUCD has secured a sufficient budget to now solicit and award up to three grants at $20,000 each (for a total of $60,000).

Q. Would using existing evidence-based parenting prevention and intervention programs through a partner community of practice that is implementing efforts align with this RFA?
A. Yes – this RFA is focused on leveraging the AUCD network centers and programs to increase workforce capacity for implementation, evaluation, and dissemination of evidence-based programs for parents of young children who may have behavioral concerns, as well as expanding the reach of existing resources.

Q. I see that this is an opportunity for state-level communities of practice/innovative practice groups. May we target a tailored approach to a region of our state rather than the whole state?
A. You may do so, although you will need to articulate your rationale in a clear way through the statement of capacity and your letters of support.

Q. What indirect rate may my university take for this program?
A. Indirect is allowable, but only up to the level of AUCD’s Federally negotiated indirect rate of 25.74%.

Q. I collaborate with my regional UCEDD/LEND but am not employed there. May I submit a proposal? Would that be considered responsive?
A. All AUCD network centers and programs are eligible to seek funding support through this RFA process. Only requests from AUCD network centers and programs will be considered.

Q. If we are successful, how would the funding flow to us?
A. Up to $20,000 will be available on a cost reimbursement basis through a sub award contract to each selected center or program. Funds may be used for expenses such as faculty/staff time, expert consultation, stipend for a trainee assistant, meeting costs, materials, and approved travel. Funds may not be used for research. There is no guarantee of additional funding in the future.
