

National Resource Center

FOR PATIENT/FAMILY-CENTERED MEDICAL HOME

**National Resource Center for Patient/Family-Centered
Medical Home**

The goal of the National Resource Center for Patient/Family-Centered Medical Home is to implement innovative programs and activities to address fragmented systems of care for children and youth with special health care needs.

We are available to provide technical assistance at the individual, community, and systems-level to increase the number of children and youth with special health care needs receiving care through a medical home.
