

Celebrating the Americans with Disabilities Act (ADA): How Assistive Technology (AT) Supports Daily Life and Work

Webinar Date: July 8, 2025 | Time: 3:00 pm to 4:30 pm Eastern Time (ET)

Join us for a special webinar in honor of the 35th anniversary of the Americans with Disabilities Act (ADA), with a focus on how technology is shaping the future of accessibility. The ADA affirms a simple but powerful principle: Individuals with disabilities who want to work should be able to work. In today's fast-paced technology-driven world, there have been advancements made with tools to increase accessibility. At the same time, there are basic assistive technology (AT) tools that continue to be overlooked as a solution. The webinar panel from the Assistive Technology Act Technical Assistance and Training Center (AT3 Center) will focus on increasing access to and acquisition of AT tools across the lifespan. The panel will share examples of how AT is that critical bridge to helping break down barriers and provide innovative approaches for one to be more independent within the workplace and the broader community.

Presenters

Marty Exline

Technical Assistance and
Training Lead
Association of Assistive
Technology Act Programs
(ATAP), AT3 Center

Kim Singleton

Grant Manager
ATAP, AT3 Center

Ryan Rausch

Technical Assistance and
Training Lead
