

Decision Making Model to Collect Initial Outcome Measure data

Updated 2/2016

IMPORTANT: You must consider these things **BEFORE** your activity to appropriately collect the data!

Before your activity happens, ask yourself – **WHICH** core function will apply to your upcoming activity?

If your **core function** choice is ...

- Interdisciplinary Pre-Service Training,
- Community Training with a frequency rate of regular, on-going trainings only meaning
 - 1) cohort of participants over a series of sessions or
 - 2) one-time trainings that reoccur with regular frequency)
- Technical Assistance for sustained relationships defined as on-going frequent with more than 3 contacts per year

If your **core function** choice is ...

- Continuing Education
- Direct Clinical Services
- Other Direct Services
- Demonstration Services
- Research
- Information Dissemination

Yes

No

You **MUST** collect **initial outcome measures data!**

Based on the core function of your activity, use the corresponding, specific question below to collect this data:

You **DO NOT NEED** to collect **Initial outcome measures data!**

Core Function

SPECIFIC Question

RESPONSES

InterPreServPrep
